Your class grade is weighted as follows:

Homework	15%
Quizzes	50%
Tests	25%
Projects/Labs	10%

- It is important that you complete reading assignments and spend time each day studying the material that was presented in class.
- Each day you must have a TI-83 or TI-84 graphing calculator.
- The majority of quizzes will be unannounced and will consist of “old” or similar class problems.
- If I should happen to make an error and you “call me on it,” you will receive one quiz bonus point.
- Late work is not accepted unless you speak with me ahead of time or you have an excused absence.
- If you are absent, and I strongly suggest that you try not to be, you are responsible for asking me about the assignments you missed. You’ll have a reasonable amount of time to complete missing work.
- Homework is assigned every night with the exception of nights before tests. Homework will always be checked for completion using the honor system. Homework may also be checked for accuracy.
- You are expected to maintain an organized notebook. Notebooks will be checked randomly and this check will count as a quiz grade.
- Of course, all school rules as stated in the student handbook and by the principal will be followed.
- In accordance with the MAUHS Math Department examination policy, your final exam is worth 20% of your overall grade.
- You may drop the lowest quiz grade if you memorize the Greek alphabet.
- You may drop the lowest test grade if you read and discuss the Copernican Revolution by Thomas S. Kuhn

I have perused and do understand the above method of grading and expectations.
